**Item for kurzweil3000.com**

1.

LTI Single Sign On

- Clients who use LTI* can be set up for SSO with LTI.

- The LTI administrator can create a kurzweil3000.com link with in their LTI supported LMS*

    o Admin can place the link where they would like.

- Clicking the link will create a new kurzweil profile for the student.

- Once the user has an LTI profile the link will log them in to kurzweil3000.com

    *LTI - Learning Tools Interoperability (by IMS Global Learning Consortium, Inc.)

    *LMS – Learning Management System such as Moodle, Canvas, etc.

Example of how it may look:

Considerations:

- When using LTI login, access to kurzweil3000.com is only available through the LMS.

- Access to RTW is only available through the **Enable Read the Web** button on the bottom left of kurzweil3000.com

- As the user will not see their password, with an LTI profile, they will not have access to the desktop client.

- If a user needs access to the desktop client an administrator can still manually create a profile via 'Add User'.

- If the LMS is changed the LTI SSO may need to be redone.
